Online Library Alphabetical How Every Letter Tells A Story Michael Rosen

From minding your Ps and Qs to wondering why X should mark the spot, *Alphabetical* is a book for everyone who loves words and language. Whether it's how letters are arranged on keyboards or Viking runes, textspeak or zip codes, this book will change the way you think about letters for ever. How on Earth did we fix upon our twenty-six letters, what do they really mean, and how did we come to write them down in the first place? Michael Rosen takes you on an unforgettable adventure through the history of the alphabet in twenty-six vivid chapters, fizzing with personal anecdotes and fascinating facts. Starting with the mysterious Phoenicians and how sounds first came to be written down, he races on to show how nonsense poems work, pins down the strange story of OK, traces our seven lost letters and tackles the tyranny of spelling, among many, many other things. His heroes of the alphabet range from Edward Lear to Phyllis Pearsall (the inventor of the A-Z), and from the two scribes of Beowulf to rappers. Each chapter takes on a different subject - codes, umlauts or the writing of dictionaries. Rosen's enthusiasm for letters positively leaps off the page, whether it's the story of his life told through the typewriters he's owned or a chapter on jokes written in a string of gags and word games. So if you ever wondered why Hawaiian only has a thirteen-letter alphabet or how exactly to write down the sound of a wild raspberry, read on . . .

From a New York Times bestselling historian comes the story of how the alphabet ordered our world. *A Place for Everything* is the first-ever history of alphabetization, from the Library of Alexandria to Wikipedia. The story of alphabetical order has been shaped by some of history's most compelling characters, such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot. But though even George Washington was a proponent, many others stuck to older forms of classification -- Yale listed its students by their family's social status until 1886. And yet, while the order of the alphabet now rules -- libraries, phone books, reference books, even the order of entry for the teams at the Olympic Games -- it has remained curiously invisible. With abundant inquisitiveness and wry humor, historian Judith Flanders traces the triumph of alphabetical order and offers a compendium of Western knowledge, from A to Z.

Contains twenty-six alphabetically arranged entries describing each letter of the Roman alphabet individually, providing facts about each letter while tracing its history, evolution, and form.

An epistolary novel set on a fictional island off the South Carolina coastline, *'Ella Minnow Pea'* brings readers to the hometown of Nevin Nollop, inventor of the pangram 'The Quick Brown Fox Jumps Over the Lazy Dog'. Deified for his achievement in life, Nevin has been honored in death with a monument featuring his famous phrase. One day, however, the letter 'Z' falls from the monument, and some of the islanders interpret the missing tile as a message from beyond the grave. The letter 'Z' is banned from use. On an island where the residents pride them-selves on their love of language, this is seen as a tragedy. They are still reeling from the shock when another tile falls. And then another... In his charming debut, first published in 2001, Mark Dunn took readers on a journey through the eyes of Ella Minnow Pea, a young woman forced to create another clever turn of phrase in order to save the islanders' beloved language.

The stories are wonderfully varied, sometimes philosophical and often end surprisingly; the drawings are just as quirky and unpredictable."-The Wall Street Journal "[W]itty from A to Z . . . no one would blame you for having a copy even if there are no kids in the house. Think of it as Edward Gorey for the preschool set - and their hip parents."-The Washington Post
