"The rhythmic, onomatopoeic text dances across exuberant watercolors with lots of movement. This celebration of a child's agency in choosing a means of artistic expression strikes just the right note." --Kirkus "A delightful offering for reading aloud, especially during music-themed storytimes." --School Library Journal From New York Times bestselling author Chris Barton and new illustrator Louis Thomas comes a fun, rhythmic picture book about finding the music that is perfect for you! A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! There's guitars and harpsichords! Bagpipes and cellos and trombones! How can he find the one that is just right for him out of all those options?

Is it possible to see across space and time? Even those who accept that humans can reach beyond the conventional five senses typically think of psychics as "special" or "gifted" with unusual abilities. But David Morehouse teaches otherwise—all human beings, including you, have the innate capacity for remote viewing. David Morehouse was trained by the U.S. government in remote viewing—an exact scientific protocol for tapping the human power to gather information across space and time. In this comprehensive manual, he has taken his military training as an "operational" remote viewer and turned it into a step-by-step training system—one that teaches any serious reader how to unlock their natural abilities and become more than the physical world allows. Remote Viewing includes more than just a method for gathering information. It is a transformational tool instilling within you the absolute and irrefutable evidence that you are more than human—that you are extraordinarily human. As you gain experience and confidence as a viewer, you will tap into the collective unconscious that connects you to everything and everyone in the universe. Through David Morehouse's training, you will learn to touch the infinite source of life and knowledge that spiritual masters throughout human history have sought. David Morehouse's superiors in the DIA/CIA called him "the most exceptional candidate ever to have grasped this difficult intelligence collection methodology." What sets him apart as a teacher is his unparalleled ability to present the complexities of remote viewing in an accessible, logical, and artful manner. As more than 23,000 students have already discovered, David Morehouse has set a new and brilliant standard for teaching the scientific protocol of remote viewing. "You have the ability to do this," Morehouse says. "Something extraordinary is absolutely possible in your life." Now for the first time, he brings you his method for taking your first step into your ultimate potential in a single volume: Remote Viewing: The Complete User's Manual for Coordinate Remote Viewing, which also includes a cool-down audio track. David Morehouse has found that this psychoacoustic "pink noise" track is especially effective for helping us enter the brainwave state of relaxed awareness needed for remote viewing.

Just published in its updated fourth edition, this highly regarded text explains in clear terms how and why the best-of-class pump users are consistently achieving superior run lengths, low maintenance expenditures, and unexcelled safety and reliability. Written by practicing engineers whose working careers were marked by involvement in all facets of pumping technology, operation, assessment, upgrading and cost management, this book endeavors to describe in detail how you, too, can accomplish optimum pump performance and low life cycle cost. A new chapter on breaking the cycle of pump repairs examines the cost of failures and the defined operating range of pumps. The authors also explore mechanical issues, deviations from best available technology, and preventing problems with oil rings and constant level lubricators. Additional topics include bearing housing protector seals, best lube application practices, lubrication and bearing distress, and paying for value.
