This guide provides information on the application of the "Commission Implementing Regulation (EU) 2019/779 of 16 May 2019 laying down detailed provisions on a system of certification of entities in charge of maintenance of vehicles<sup>1</sup> pursuant to Directive (EU) 2016/798 of the European Parliament and of the Council and repealing Commission Regulation (EU) No 445/2011 [1]" as referred to in Article 14(6) and (8) of the Safety Directive. That regulation will be referred to in the present document as the "ECM Regulation". This guide aims at a correct and common understanding of the concepts of ECM developed in the ECM Regulation but does not contain any legally binding advice. It contains explanatory information of potential use to all actors<sup>2</sup> whose activities may have an impact on the safety of railway systems and who directly or indirectly need to apply the ECM Regulation. It may serve as a clarification tool without however dictating in any manner compulsory procedures to be followed and without establishing any legally binding practice. The guide provides explanations on the provisions contained in the ECM Regulation and should aid understanding of the approaches and rules described therein. This guide has been prepared by the European Union Agency for Railways (EUAR) with the support of Recognised Bodies and National Safety Authority experts. It represents a developed collection of information gathered by the Agency during internal meetings and meetings with ACBs (Accredited Certification Bodies), RCBs (Recognised Certification Bodies) and NSAs.

SharePoint experts focus on SharePoint 2010 as a platform for Enterprise Content Management SharePoint allows all users in an organization to manage and share their content reliably and securely. If you're interested in building Web sites using the new capabilities of enterprise content management (ECM) in SharePoint 2010, then this book is for you. You'll discover how SharePoint 2010 spans rich document management, records management, business process management and web content management in a seamless way to manage and share content. The team of SharePoint experts discusses the ECM capabilities included in SharePoint Server 2010 that will assist with your workflow and content management. They cover Web content management (WCM) features and discuss accessibility and extensibility as well as scale and compliance. Shows how to use the capabilities of enterprise content management (ECM) to build Web sites Covers SharePoint 2010 ECM features and WCM (Web Content Management) features Reviews workflow and content management, mater pages and layouts, scale and compliance, and accessibility and extensibility Features real-world examples and code samples to help with your learning process Packed with code examples and real-world scenarios, this comprehensive book provides you with the information you need to get started using ECM with SharePoint 2010 today.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: •Build an accurate threat model for your vehicle •Reverse engineer the CAN bus to fake engine signals •Exploit vulnerabilities in diagnostic and data-logging systems •Hack the ECU and other firmware and embedded systems •Feed exploits through infotainment and vehicle-to-vehicle communication systems •Override factory settings with performance-tuning techniques •Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Originally published in 1912, this novel was one of the first to present a frank picture of being black in America. Masked in the tradition of the literary confession practiced by such writers as St. Augustine and Rousseau, this "autobiography" purports to be a candid account of its narrator's private views and feelings as well as an acknowledgement of the central secret of his life: that though he lives as a white man, he is, by heritage and experience, an African-American. Written by the first black executive secretary of the NAACP, *The Autobiography of an Ex-Colored Man*, in its depiction of turn-of-the-century New York, anticipates the social realism of the Harlem Renaissance writers. In its unprecedented analysis of the social causes of a black man's denial of the best within himself, it is perhaps James Weldon Johnson's greatest service to his race. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

"Covers all aspects of records management and recordkeeping, including policy, responsibilities, recordkeeping processes, system design and technology." - page 5.

What is expected of State authorities with regard to the obligation to safeguard the life of detainees? What obligations do State authorities have in relation to the investigation into deaths that occur during deprivation of liberty by the State? This book addresses these questions regarding death in State custody in view of the European Convention on Human Rights, in particular the right to life, the prohibition of torture and the right to respect for private life (including the right to self-determination). It also provides an analysis of whether the Dutch legal framework contains safeguards to meet the requirements that follow from the European Convention on Human Rights. Matters that are discussed in detail are the obligation to provide healthcare to detainees and to take protective measures to safeguard the life of detainees. The ethical issues regarding end of life decisions of detainees, like refusal of medical treatment, hunger and/or thirst strike, suicide and euthanasia, and the conflicts that may arise in this regard considering the obligations of State authorities are addressed. This book is a must-have for all those who are involved in the (medical) treatment of detainees and who are confronted with death in State custody.

Native plants are a foundation of ecological function, affecting soil conservation, wildlife habitat, plant communities, invasive species, and water quality. Establishing locally-adapted, self-sustaining plant communities can also support transportation goals for safety and efficiency. Past obstacles to establishing native plant communities on roadsides have been technical, informational, and organizational. Effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners. Multiple disciplines, ranging from engineering to soil science, ecology, botany, and wildlife science, must be able to work cooperatively, not in isolation. This report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road modifications. It guides readers through a comprehensive process of: 1) initiating, 2) planning, 3) implementing, and 4) monitoring a roadside revegetating project with native plants.
