Fitting Machining - AbeBooks
FWIW, the port is not specific to AN fittings. There's all sorts of industrial and construction equipment that uses o-ring boss ports for hydraulic connections using both JIC and SAE flare adapters, with not an AN fitting anywhere in sight. They work particularly well in tight locations where its near impossible to tighten or loosen a pipe to flare type adapter in the larger sizes.

How do you machine AN fittings?!!?!??!!?!???
Certificate III in Engineering – Mechanical Trade (Fitting & Machining) MEM30298 Qualification Description: Off-the-Job skills for apprentices employed under a contract of training in the Fitting and Machining field of work within the Engineering Industry.

Fitting & Machining Jobs - Fitting & Machining Careers ...
Machining is any of various processes in which a piece of raw material is cut into a desired final shape and size by a controlled material-removal process. The processes that have this common theme, controlled material removal, are today collectively known as subtractive manufacturing , [1] in distinction from processes of controlled material addition, which are known as additive manufacturing .

Level 2 - TTE
Milling is the process of machining using rotary cutters to remove material by advancing a cutter into a work piece. This may be done varying direction on one or several axes, cutter head speed, and pressure. Milling covers a wide variety of different operations and machines, on scales from small individual parts to large, heavy-duty gang milling operations.
