Project MUSE - Kinesics and Context

A product of systematic social interaction, the kinesic system is a social system. Out of the range of muscular adjustments produced by a human being, some are utilized by the social system for communicational purposes. Thus, to say it simply, no human body produces a kine (least kinesic unit); it moves or adjusts in a set of muscular relationships. In social interaction, certain of these have demonstrable special utility in the communicational process.

Kinesics and Context: Essays on Body Motion Communication ...

Ray L. Birdwhistell (September 29, 1918 – October 19, 1994) was an American anthropologist who founded kinesics as a field of inquiry and research. Birdwhistell coined the term kinesics, meaning "facial expression, gestures, posture and gait, and visible arm and body movements". He estimated that "no more than 30 to 35 percent of the social meaning of a conversation or an interaction is ...

Ray L. Birdwhistell, in this study of human body motion (a study he terms kinesics), advances the theory that human communication needs and uses all the senses, that the information conveyed by human gestures and movements is coded and patterned differently in various cultures, and that these codes can be discovered by skilled scrutiny of particular movements within a social context.

This book brings together five of Goffman's seminal essays: "Replies and Responses," "Response Cries," "Footing," "The Lecture," and "Radio Talk."

Selected by Choice magazine as an Outstanding Academic Book Argues that anyone—anthropologist, psychologist, or policeman—who uses what people say to find out what people think had better know how speech itself is organized.

A highly influential scholar urges that linguistics be studied as part of the entire communicative conduct of social groups and demonstrates the mutual relation between linguistics and other disciplines, such as sociology, social anthropology, and education.

GUEST/ORDINARY PEOPLE

Gregory Bateson was a philosopher, anthropologist, photographer, naturalist, and poet, as well as the husband and collaborator of Margaret Mead. This classic anthology of his major work includes a new Foreword by his daughter, Mary Katherine Bateson. 5 line drawings.

Linguists and lawyers from a range of countries and legal systems explore the language of the law and its participants, beginning with the role of the forensic linguist in legal proceedings, either as expert witness or in legal language reform. Subsequent chapters analyze different aspects of language and interaction in the chain of events from a police emergency call through the police interview context and into the courtroom, as well as appeal court and alternative routes to justice. A broad-based, coherent introduction to the discourse of language and law.

Language use is fundamentally multimodal. Speakers use their hands to point to locations, to represent content and to comment on ongoing talk; they position their bodies to show their orientation and stance in interaction; they use facial displays to comment on what is being said; and they engage in mutual gaze to establish intersubjectivity. This volume brings together studies by leading scholars from several fields on gaze and facial displays, on the relationship between gestures, sign, and language, on pointing and other conventionalized forms of manual expression, on gestures and language evolution, and on gestures in child development. The papers in this collection honor Adam Kendon whose pioneering work has laid the theoretical and methodological foundations for contemporary studies of multimodality, gestures, and utterance visible action.
