SR5006 - Marantz

Marantz has a product that is both powerful and easy to use and they do a lot of things right. The SR5006 is a 100W x 7.1-channel AV receiver that can do a second Zone. The only exception is that it has only a single pair of speaker binding posts that can be used for either Surround Back or the second Zone.

Composers and sound artists have explored for decades how to transform microphones and loudspeakers from "inaudible" technology into genuinely new musical instruments. While the sound reproduction industry had claimed perfect high fidelity already at the beginning of the twentieth century, these artists found surprising ways of use – for instance tweaking microphones, swinging loudspeakers furiously around, ditching microphones in all kinds of vessels, or strapping loudspeakers to body parts of the audience. Between air and electricity traces their quest and sets forward a new theoretical framework, providing historic background on technological and artistic development, and diagrams of concert and performance set-ups. From popular noise musician Merzbow to minimalist classic Alvin Lucier, cult instrument inventor Hugh Davies, or contemporary visual artist Lynn Pook – they all aimed to make audible what was supposed to remain silent. www.microphonesandloudspeakers.com

The real reasons for the war In Iraq--"control of all pricing and policies, expansion of US power, establishment of US bases in the strategic Middle East, defense of Israel--"were kept hidden from the American people. Instead, justifications for the illegal war were cloaked in the high-sounding slogans of "fighting the war on terrorism," "keeping nuclear weapons out of the hands of rogue states," and finally, "bringing democracy to the Middle East."

This is a book about a gambling system that works. It tells the story of how the author used computer simulations and mathematical modeling techniques to predict the outcome of jai-alai matches and bet on them successfully - increasing his initial stake by over 500% in one year! His results can work for anyone: at the end of the book he tells the best way to watch jai-alai, and how to bet on it. With humour and enthusiasm, Skiena details a life-long fascination with computer predictions and sporting events. Along the way, he discusses other gambling systems, both successful and unsuccessful, for such games as lotto, roulette, blackjack, and the stock market. Indeed, he shows how his jai-alai system functions just like a miniature stock trading system. Do you want to learn about program trading systems, the future of Internet gambling, and the real reason brokerage houses don't offer mutual funds that invest at racetracks and frontons? How mathematical models are used in political polling? The difference between correlation and causation? If you are curious about gambling and mathematics, odds are this book is for you!

Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution "I am proud to call myself a straphanger," writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is underfunded, ill maintained, and ill conceived. But as the demand for petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create convenient, affordable, and sustainable urban transportation—and better city living—for all.

How much risk should we take? A Short Guide to Risk Appetite sets out to help all those who need to decide how much risk can be taken in a particular risky and important situation. David Hillson and Ruth Murray-Webster introduce the RARA Model to explain the complementary and central roles of Risk Appetite and Risk Attitude, and along the way they show how other risk-related concepts fit in. Risk thresholds are the external expression of inherent risk appetite, and the challenge is how to set the right thresholds. By progressively deconstructing the RARA Model, the authors show that the essential control step is our ability to choose an appropriate risk attitude. The book contains practical guidance to setting risk thresholds that take proper account of the influences of organisational risk culture and the individual risk preferences of key stakeholders. Alongside this, individuals and organisations need to choose the risk attitude that will optimise their chances of achieving the desired objectives.

Young playwright draws on family as the raw material for his first work. Cast of 4 women and 3 men.

In 1942, a ship carrying over a hundred soldiers ran aground off the Burin Peninsula, killing most of its men. Lanier Phillips, the sole African-American survivor of the wreck, is rescued and cared for by the locals, where he is not judged by the color of his skin. An honest legend that still resonates with power nearly seventy years later.

"Pardon my French, but you are one darn major American writer!"-Richard Bach The twelve literary, suspense tales and dark vignettes collected in Sandcastle and Other Stories are nothing short of an adventure through a roiling sea of emotion. You'll listen as an old man twisted by fate and a lost love shares his life's journey . . . marvel at a young girl playing on the ocean shore as she becomes entangled in nets of a mercurial god . . . witness a divorced man become mired in troubles after he's coerced into taking a singles cruise . . . follow a Hollywood actor in a television drama who's always typecast as the bad boy . . . struggle along with a child kept awake by night terrors, and, most shockingly, observe a woman who hides her secretive personality from everyone on the beach one sunny day. The genuine voices of the characters, mixed with a clear-eyed tonal directness, make this a series with mesmerizing psychological interaction. Sandcastle and Other Stories spans a broad depth of human understanding and builds a bridge between the deepest chasms of human frailty, and, by the last tale, the highest portal of redemption. Read and stand witness to unspeakable hate sitting with cozy wile, right beside unconditional love-a provocative and compelling mirror on the human condition. "Bog has a keen eye for what makes people tick, especially when their clockwork is decidedly rusty and the urges it drives are less than ideal. These stories take a microscopic view at the ordinary that, in turn, molds it into something uncanny. The underlying darkness takes different forms with each one, but never is it absent, and never does it feel anything less than utterly natural."-Josh Black, horror novel reviews
