From renowned artist Gregory Manchess comes a lavishly painted novel about the son of a famed polar explorer searching for his stranded father, and a lost city buried under snow in an alternate future. When it started to snow, it didn't stop for 1,500 years. The Pole Shift that ancient climatologists talked about finally came, the topography was ripped apart and the weather of the world was changed—forever. Now the Earth is covered in snow, and to unknown depths in some places. In this world, Wes Singleton leaves the academy in search of his father, the famed explorer Galen Singleton, who was searching for a lost city until Galen's expedition was cut short after being sabotaged. But Wes believes his father is still alive somewhere above the timberline. Fully illustrated with over 120 pieces of full-page artwork throughout, *Above the Timberline* is a stunning and cinematic combination of art and novel.

Studying successfully at high school, college or university requires more than discipline, diligence and determination. Students must also come to grips with a crucial range of essential skills if they wish to turn toil into triumph. *Study Skills for Successful Students* shows you how to improve your learning skills and performance.

The study of the mapping class group $\text{Mod}(S)$ is a classical topic that is experiencing a renaissance. It lies at the juncture of geometry, topology, and group theory. This book explains as many important theorems, examples, and techniques as possible, quickly and directly, while at the same time giving full details and keeping the text nearly self-contained. The book is suitable for graduate students. *A Primer on Mapping Class Groups* begins by explaining the main group-theoretical properties of $\text{Mod}(S)$, from finite generation by Dehn twists and low-dimensional homology to the Dehn-Nielsen-Baer theorem. Along the way, central objects and tools are introduced, such as the Birman exact sequence, the complex of curves, the braid group, the symplectic representation, and the Torelli group. The book then introduces Teichmüller space and its geometry, and uses the action of $\text{Mod}(S)$ on it to prove the Nielsen-Thurston classification of surface

Where To Download Nmu Exam Time Table For Engineering

homeomorphisms. Topics include the topology of the moduli space of Riemann surfaces, the connection with surface bundles, pseudo-Anosov theory, and Thurston's approach to the classification.

This book is the only available comprehensive introduction to tribal law. It is an indispensable resource for students, tribal leaders, and professionals interested in the complicated relationship between tribal, federal, and state law.

Native America: A History, Second Edition offers a thoroughly revised and updated narrative history of American Indian peoples in what became the United States. The new edition includes expanded coverage of the period since the Second World War, including an updated discussion of the Red Power Movement, the legal status of native nations in the United States, and important developments that have transformed Indian Country over the past 75 years. Also new to this edition are sections focusing on the Pacific Northwest. Placing the experiences of native communities at the heart of the text, historian Michael Leroy Oberg focuses on twelve native communities whose histories encapsulate the principal themes and developments in Native American history and follows them from earliest times to the present. A single volume text ideal for college courses presenting the history of native peoples in the region that ultimately became the United States from ancient America to the present. A work that illustrates the great diversity in the historical experience of native peoples and spotlights the importance of Native Americans in the history of North America. A supplementary website (MichaelLeroyOberg.com) includes resources for teachers and students, including a resource guide, links to primary source documents, suggestions for additional readings, test and discussion questions, and an author's blog.
