As Katherine Verdery observes, "There's nothing like reading your secret police file to make you wonder who you really are." In 1973 Verdery began her doctoral fieldwork in the Transylvanian region of Romania, ruled at the time by communist dictator Nicolae Ceausescu. She returned several times over the next twenty-five years, during which time the secret police—the Securitate—compiled a massive surveillance file on her. Reading through its 2,781 pages, she learned that she was "actually" a spy, a CIA agent, a Hungarian agitator, and a friend of dissidents: in short, an enemy of Romania. In *My Life as a Spy* she analyzes her file alongside her original field notes and conversations with Securitate officers. Verdery also talks with some of the informers who were close friends, learning the complex circumstances that led them to report on her, and considers how fieldwork and spying can be easily confused. Part memoir, part detective story, part anthropological analysis, *My Life as a Spy* offers a personal account of how government surveillance worked during the Cold War and how Verdery experienced living under it.

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem. Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.
