Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

Unleashing your inner tigress isn't easy when you're a doormat by nature! Still, after escaping a wretched marriage to a cheating SOB, Dallas party planner Naomi Delacroix isn't about to let another man sweet-talk her into sheathing her protective claws. Not even hunky millionaire Royce Powell, who's hired her to arrange his mother's surprise party. Even if he does make her purr like a kitten with one heated glance... Royce claims he's been in love with her ever since she threw a party for one of his friends six months ago. But if that's true, why is this incredibly eligible CEO currently taking applications for a wife? Despite herself, Naomi is tempted to fill one out. But can her inner tigress believe a man might change his stripes?

Thousands of organizations are adopting Scrum to transform the way they execute complex projects, in software and beyond. This guide will give you the skills and confidence needed to deploy Scrum, resulting in high-performing teams and satisfied customers. Drawing on years of hands-on experience helping companies succeed, Certified Scrum Trainer (CST) Mitch Lacey helps you overcome the major challenges of Scrum adoption and the deeper issues that emerge later. Extensively revised to reflect improved Scrum practices and tools, this edition adds an all-new section of tips from the field. Lacey covers many new topics, including immersive interviewing, collaborative estimation, and deepening business alignment. In 35 engaging chapters, you'll learn how to build support and maximize value across your company. Now part of the renowned Mike Cohn Signature Series on agile development, this pragmatic guide addresses everything from establishing roles and priorities to determining team velocity, setting sprint length, and conducting customer reviews. Coverage includes Bringing teams and new team members on board Creating a workable definition of "done" Planning for short-term wins, and removing impediments to success Balancing predictability and adaptability in release planning Running productive daily scrums Fixing failing sprints Accurately costing projects,

and measuring the value they deliver Managing risks in dynamic Scrum projects Prioritizing and estimating backlogs Working with distributed and offshore teams Institutionalizing improvements, and extending agility throughout the organization Packed with real-world examples straight from Lacey's experience, this book will be invaluable to anyone transitioning to Scrum, seeking to improve their early results, or trying to get back on track.

Revised and Updated, Featuring a New Case Study How do successful companies create products people can't put down? Why do some products capture widespread attention while others flop? What makes us engage with certain products out of sheer habit? Is there a pattern underlying how technologies hook us? Nir Eyal answers these questions (and many more) by explaining the Hook Model—a four-step process embedded into the products of many successful companies to subtly encourage customer behavior. Through consecutive “hook cycles,” these products reach their ultimate goal of bringing users back again and again without depending on costly advertising or aggressive messaging. Hooked is based on Eyal's years of research, consulting, and practical experience. He wrote the book he wished had been available to him as a start-up founder—not abstract theory, but a how-to guide for building better products. Hooked is written for product managers, designers, marketers, start-up founders, and anyone who seeks to understand how products influence our behavior. Eyal provides readers with:

- Practical insights to create user habits that stick.
- Actionable steps for building products people love.
- Fascinating examples from the iPhone to Twitter, Pinterest to the Bible App, and many other habit-forming products.

Men's Health magazine contains daily tips and articles on fitness, nutrition, relationships, sex, career and lifestyle.

This story describes USAC sprint car racing in the early 1960s and a driver named Stan Bowman. It captures Bowman's win at the first USAC sprint car race at Eldora Speedway in 1962. Bowman also captured the attention of Clint Brawner, the legendary Indianapolis 500 mechanic of that era. The story is told through the eyes of Diane Beck Lane, who was daughter of Harold Beck, the owner of Bowman's race car at Eldora in 1962. In 2012, Eldora Speedway, now owned by Tony Stewart, honored the 50th anniversary of Bowman's victory and Diane Beck Lane now retells the legend of Stan Bowman in the golden era in USAC sprint car racing.

In the fall of 1966, in the mountain town of Boone, North Carolina, three teens wrestle with what life will hold after graduation. Each with baggage out casting them from the rest of the town, the three rely on each other for support. Amber, the orphaned daughter of a tarnished woman, Curtis, a mentally handicapped teen with severe social disorders and Sonny, the son of the town alcoholic. Amber and Sonny are in love and both protect Curtis to a fault. The trio form an unbreakable bond inside their own little bubble. Sonny is the strength that binds them together, but when events happen that force him to enlist in the Army, he is pulled from the group and sent to fight the war in Vietnam. Returning to Boone years later, Sonny, now mentally and physically broken from his experiences in the war finds that things have changed.

Having lost touch with everyone, Sonny finds that Amber has moved on to an abusive relationship, Curtis' mental health have spiraled out of control, and that his own father is struggling with health issues. Sonny is determined to get his life back in order and help the ones that he left behind years ago. Working through his own demons, Sonny is once again immersed into a toxic small town where everyone is a little bit broken. He finds that his need to help Curtis has not waned, nor his love for Amber. Wanting nothing more than to fulfill a promise made years before, Sonny struggles with life after the war, while still dealing with the war at home.
