Nintendo's hugely popular and influential video game console system considered as technological device and social phenomenon. The Nintendo Wii, introduced in 2006, helped usher in a

moment of retro-reinvention in video game play. This hugely popular console system, codenamed Revolution during development, signaled a turn away from fully immersive, time-consuming MMORPGs or forty-hour FPS games and back toward family fun in the living room. Players using the wireless motion-sensitive controller (the Wii Remote, or “Wiimote”) play with their whole bodies, waving, swinging, swaying. The mimetic interface shifts attention from what's on the screen to what's happening in physical space. This book describes the Wii's impact in technological, social,

and cultural terms, examining the Wii as a system of interrelated hardware and software that was consciously designed to promote social play in physical space. Each chapter of Codename Revolution focuses on a major component of the Wii as a platform: the console itself, designed to be low-powered and nimble; the iconic Wii Remote; Wii Fit Plus, and its controller, the Wii Balance Board; the Wii Channels interface and Nintendo's distribution system; and the Wii as a social platform that not only affords multiplayer options but also encourages

social interaction in shared physical space. Finally, the authors connect the Wii's revolution in mimetic interface gaming—which eventually led to the release of Sony's Move and Microsoft's Kinect—to some of the economic and technological conditions that influence the possibility of making something new in this arena of computing and culture.

La numerosa clientela de los productos falsificados se compone sobre todo de personas con poco poder adquisitivo y más o menos conscientes de comprar artículos de imitación, pero

poco avisadas de que algunos pueden resultar peligrosos para la salud, como los perfumes y los cosméticos. La mayoría también desconoce que, por dónde y cómo se venden esos artículos, prácticamente eliminan derechos básicos de los consumidores, como las garantías y la posibilidad de reclamación. Con las calles de las principales ciudades abarrotadas en busca de regalos, las Navidades son, junto con el verano, una de las épocas en que se dispara la venta de productos falsificados, artículos en general a precios "populares" que imitan o plagian los de

marcas prestigiosas. Y, consecuentemente, aumenta el número de operaciones policiales, incautaciones y detenciones en el top manta, mercadillos, bazares, tiendas con pocos escrúpulos y almacenes para la distribución y venta ilegal a pie de calle o por Internet. Como muestra de esta realidad, el pasado verano fue pródigo en la "caza" del producto falso. A primeros de julio de 2018, la Guardia Civil desmanteló en Valencia dos fábricas de pilas falsas con más de un millón de unidades en stock y el doble de etiquetas y embalajes con los logotipos de marcas del sector.

Fabricadas por empleados en condiciones penosas y sin controles de calidad, esas pilas podrían resultar peligrosas para los aparatos y las personas que las utilizaran. Durante los Sanfermines, la Policía Nacional detuvo en Pamplona a una banda especializada en delitos contra la propiedad industrial e intelectual con tres toneladas de calzado y ropa de vestir y deportiva, en apariencia, de marcas de primera fila valoradas en dos millones de euros. Pero no todo se limita a productos de uso cotidiano. A finales de julio, se desmanteló una organización que vendía vinos de Ribera

de Duero de unos 20 euros a precios de hasta 1.900 euros la botella. Los hacían pasar por caldos de marcas tan exclusivas como Flor de Pingus, Vega Sicilia Único y Vega Sicilia Quinta Valbuena y los vendían en Internet, en portales de subastas e incluso en restaurantes de categoría. Muchas de estas operaciones parten de denuncias de marcas afectadas por la falsificación. Eso ocurrió, por ejemplo, a finales de agosto de 2018 con el decomiso en cinco tiendas de un centro comercial de Benidorm (Alicante) de medio millar de bolsos, carteras, gorras, colgantes,

pendientes y relojes de marcas conocidas. Uno de los denunciantes fue la Federación de la Industria Relojera Suiza. La marca de ropa y complementos Michael Kors puso una denuncia similar que trajo consigo a primeros de septiembre una redada en seis locales de La Junquera (Girona) y que se saldó con la retirada de unas 5.000 piezas de ropa, calzado y bolsos. También a finales de verano, se desmanteló a partir de una denuncia un centro de distribución en Palma donde se incautaron 8.300 artículos presuntamente de marcas de lujo como Adidas, Louis Vuitton, Gucci, Hugo

Boss y Armani, cuya venta callejera habría hecho una caja de más de dos millones de euros. Estas operaciones policiales se repiten en otras épocas del año y no son más que el reflejo de una realidad: mientras el marketing siga creando en la sociedad el ansia de poseer, usar y lucir artículos de marcas famosas, y mientras sus precios estén fuera del alcance de buena parte de los consumidores, habrá quien se la juegue con la ley fabricando, transportando y vendiendo falsificaciones, y no faltará quien, bien por desconocimiento o por "necesidad", las compre. Y

no se atisba el menor indicio de que nada de eso vaya a cambiar. Al contrario, el mercado de lo falso sigue creciendo y alcanzando cifras asombrosas. En junio de 2018 la Oficina de Propiedad Intelectual Comunitaria (EUIPO) presentó los resultados de una investigación realizada en los últimos cinco años en toda la Unión Europea (UE) centrada en los 13 sectores más castigados por la piratería: artículos deportivos, baterías y pilas, bebidas espirituosas y vinos, bolsos y equipaje, cosméticos, perfumes y artículos de higiene

personal, joyería y relojería, juguetes y juegos, música, neumáticos, pesticidas, productos farmacéuticos, ropa y teléfonos móviles. El informe de la EUIPO revela que, en esos sectores, las falsificaciones restan al mercado legal un 7,5 % de las ventas y que conllevan la destrucción de 434.000 puestos de trabajo y unas pérdidas en la UE de 60.000 millones de euros al año, por el no abono de impuestos, cotizaciones y otros ingresos. En todo el mundo, según la Interpol, estas pérdidas anuales ascenderían a más de 220.000 millones de euros. En

España, estos 13 sectores pierden anualmente el 9,3 % de sus ventas: 6.200 millones de euros. En el caso de la perfumería y cosmética, ese porcentaje se eleva al 16,2 % (el doble de la media europea), según la patronal Stanpa: 933 millones de euros de los 5.828 que pierde anualmente el sector en la UE. La piratería de artículos deportivos en nuestro también duplica la media de la zona del euro, donde esta industria emplea a 43.000 trabajadores en 4.271 empresas y pierde 7.500 millones al año solo en artículos como balones, esquís y complementos.

Visto el perjuicio económico y social que provocan los productos falsificados, no es de extrañar la gravedad de las acusaciones que suelen recaer sobre las personas detenidas en operaciones contra la piratería: pertenencia a organización criminal, delitos contra la salud pública, contra la propiedad industrial, estafa, blanqueo de capitales, evasión fiscal... Pero ¿y los consumidores que adquieren productos falsificados? ¿Cometen algún delito? El artículo 298.1 del Código Penal dice que será castigado con pena de prisión de seis meses a dos

años quien, con ánimo de lucro y sabiendo que comete un delito "contra el patrimonio o el orden socioeconómico", reciba, adquiera u oculte productos de origen ilícito. Pero... ¿quién va a denunciar a un joven que compra por 25 euros en una web pirata o en las redes sociales una camiseta de su equipo favorito que en la tienda oficial cuesta cinco o seis veces más? ¿Quién denuncia a un ama de casa que compra en un mercadillo por 30 euros un bolso que parece de Chanel? ¿Y a una chica que adquiere en un bazar "unas gafas de sol Ray-Ban" por 42 euros? ¿Cómo demostrar que

eran conscientes de comprar cosas pirateadas y de ser cómplices de ese mercado ilegal? Habrá consumidores que compren productos falsos a sabiendas. Pero muchos otros piensan que han encontrado un chollo que estaba en promoción, y algunos son víctimas de una estafa pura y dura. De ahí que apenas se tengan noticias -en EKA/ACUV no conocemos ninguna- sobre denuncias, juicios y menos aún condenas a consumidores por comprar productos falsos. Cuando se hace una redada en el top manta o en un almacén con productos falsos, quienes tratan de escapar son los vendedores;

a los compradores no los detiene la Policía ni los acusa de nada. Esa es la realidad, que no obsta para que, consciente o inconscientemente, los compradores de productos falsos contribuyan a sostener ese mercado y sus consecuencias.

This book focuses on improving well-being among young children. It provides a theoretical base

explaining why physical activity is important, and offers practical strategies for increasing health and well-being in early childhood settings. It takes ancient wisdom on the mind and body connection, applies it to the youngest children, and supports it with current empirical and international evidence—all with an eye toward improving wellness across the lifespan. The many topics discussed in the book include children's motor skills, movement, interaction, physical literacy, the use of video games, dog ownership, developmental delays, as well as strategies to

improve physical activities in the classroom and broader contexts. In recent years, children's health has become a priority worldwide. Topics such as "screen time" "sedentary behavior" and "childhood obesity" have become important issues everywhere- in the news, in schools, in community and commercials settings, and among health care providers. Limiting sedentary behavior, increasing physical activity, and maintaining a nutritious diet are three fundamental needs during early childhood. Preschool years are a time when children begin to explore the world around them, and

develop more vivid understandings of their surroundings. As this book shows, the early years may be the best time to teach wellness concepts and assist young children in establishing healthy lifestyle habits.
